MAKING THE FOREST WORTH MORE STANDING THAN CUT

WHAT IS FAS?

The Sustainable Amazon Foundation (FAS) is a Brazilian non-governmental organization, non-for profit motives, of state and federal public utility. It was created on February 8th, 2008 by means of a partnership between the Amazonas State Government and Bradesco Bank. Today FAS has 210 partnerships with research institutions, private companies, governmental institutions, social organizations and other non-governmental organizations.

FAS' mission is to promote sustainable development goals, with a focus on improving life quality of traditional forest peoples and environmental conservation. The main initiatives are implemented by the Bolsa Floresta Program (PBF), Education and Health Program (PES) and Innovative Solutions Program (PSI), an international program with a focus on South-South cooperation. FAS also acts as executive secretariat for the Sustainable Development Solutions Network (SDSN) for the Amazon region.

PROGRAMS

BOLSA FLORESTA PROGRAM

The Bolsa Floresta Program (PBF) is a public state policy instituted by the Govern of Amazonas in 2007. Its creation was a historical milestone in the promotion of sustainable development of great relevance on national scale and on international as well. It is a pioneer initiative that aims in the rewarding, and improvement of the Amazon riverine people's welfare, responsible for the maintenance of the environmental services provided by the forest in protected areas created in the state government jurisdiction. The Program implements four components: Income, Social, Family and Association.

EDUCATION & HEALTH PROGRAM

One of the core sustainable development programs implemented by FAS is the Health and Education Program, wich is aimed to promote, support and enhance the quality of public services on health, education and citizenship for communities. The Program also advocates and develops innovative approaches on education and health public policies for the benefit of remote areas in Amazonia.

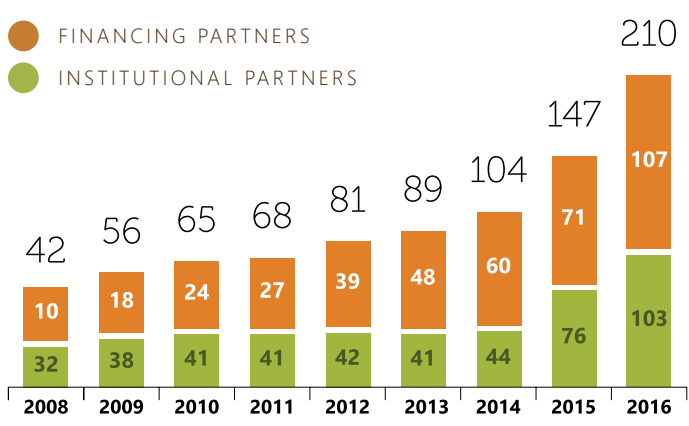

INNOVATIVE SOLUTIONS PROGRAM

FAS has been leading the discussion, designing, implementation and dissemination of innovative solutions towards the sustainable development. Always working with high-level partners, FAS cocreates and enhances solutions on forest conservation, people's welfare, social empowerment, education, income generation, and others, within the sustainable development Goals. Therefore, the Innovative Solutions Program (PSI) fosters, monitors and evaluates transformative solutions for the sustainable development in the Amazon.

MANAGEMENT AND TRANSPARENCY PROGRAM

The administrative and financial activities aim to guarantee the necessary support for technical areas of the institution. Always striving for maximum efficiency, FAS promotes in a differential way its ability to work the bureaucratic and regulatory aspects of its activities, seeking greater speed in the actions, respecting norms, procedures, legislation and other obligations. Besides, FAS is committed to the highest ethical standards and adherence to laws, regulations and policies pertaining to its activities through an Ethics Committee, independent audits and good governance through a Board of Directors, Supervisory Board, Advisory Board and Executive Committee.
